EXPERIENCE

Anvera Health

Software Engineer

Jan 2026 – Present

Bengaluru, Karnataka, India

- Built the patient portal end-to-end — 8+ modules including symptom checker, triage/urgency check, lab-result and ICD-11 diagnosis explainers, care plans, medical records, appointments, and immunisation tracking
- Designed the data model and backend — 50+ PostgreSQL tables and REST APIs — with two-factor login, role-based access, and a consent-based caretaker module
- Drove core architecture and infrastructure decisions — schema design, migrations, authentication, email delivery, and AWS deployment (EC2 + RDS, Cloudflare, Redis, SES)
- Integrated India's health stack (ABHA/ABDM) and an Ayushman Bharat referral engine matching 3,000+ empanelled hospitals, built to DPDPA-2023 privacy standards

PROJECTS

dunnflow – Payment Recovery Platform for SaaS

(Founder) | Next.js, Stripe Connect, Supabase

2026

- Built and launched a complete SaaS, **live at dunnflow.com** — recovers failed Stripe subscription payments via webhook processing, automated recovery-email sequences, and per-account dashboards on multi-tenant Supabase (RLS)
- Implemented one-click Stripe Connect (OAuth) onboarding — a customer connects their Stripe account and is fully set up in ~3 minutes with no code or keys
- Built usage-based fee billing (20% of recovered revenue) with idempotent charging — Stripe idempotency keys + unique invoice constraints guarantee no double-charge; refunds and disputes are auto-excluded from fees
- Shipped the full product solo — landing/pricing/comparison pages, live read-only demo, a free “Leak Check” analysis tool, Slack/Discord alerts, and SEO (90+ indexed pages)

Online Ring Size – Consumer Measurement Tools

| Astro, i18n, SEO

2026

- Built and launched **onlineringsize.com** — a free ring-size calculator that calibrates the user's screen against real objects (bank card, coin, paper) and reads sizes in 11 national standards, with an honest accuracy range on every result
- Reached **500+ users and 3,000+ tracked events in the last month** through organic Google traffic — grew it into a full suite: bracelet, necklace, watch-strap and earring tools, a printable sizer, multiple languages

FINA – AI-Powered Personal Finance Platform

| Next.js, Supabase, Prisma, Clerk, Arcjet, AI

2025

- Developed a full-stack AI finance application that automates expense tracking — receipt scanning with AI-powered OCR extracts and categorises transactions automatically
- Built a real-time financial analytics dashboard showing spending patterns, with optimised Prisma/PostgreSQL queries and scheduled background jobs for recurring transactions

Moviar – Movie Discovery Platform

| React, API Integration, TMDB, Responsive Design

2025

- Built a movie discovery platform integrated with the TMDB API, serving 10,000+ movies with real-time data updates and advanced filtering
- Implemented search with autocomplete and a fully responsive layout across mobile, tablet, and desktop

EDUCATION

Andhra University College of Engineering

B.Tech - Computer Science and Engineering - CGPA: 7.98

2021 – 2025

Visakhapatnam, Andhra Pradesh

TECHNICAL SKILLS

Programming Languages: C, C++, JavaScript, TypeScript, SQL, HTML/CSS

Frontend Technologies: React, Next.js, Astro, Tailwind CSS, Redux, Vite

Backend & Databases: Node.js, Express, REST APIs, PostgreSQL, MongoDB, Redis, Supabase

Tools & Platforms: Git/GitHub, AWS (EC2, RDS, SES), Stripe (Connect, webhooks, billing), Cloudflare, Vercel

Coursework: DSA, OOP, DBMS, Operating Systems, Computer Networks, AI/ML, Cloud Computing
